Special Clean-Up Sale of Unsold Stock

At Greatly Reduced Prices

We have at the present time, dug and in storage for immediate shipment, the following list of unsold nursery stock. This stock is first class in every respect—fully dormant and in excellent condition for successful planting. As long as our supply lasts we are offering this stock at special clean-up prices—approximately one half our regular price. No matter how far advanced the foliage is in your section you still have plenty of time to plant. Planting can be successfully done as long as the nursery stock to be planted can be kept in dormant condition. In our storage cellars this stock will remain dormant well up to the first of June. We suggest, however, that you order immediately, for at these reduced prices our supply will sell out rapidly. Name a second choice if you can use other varieties. We will not substitute varieties, however, unless you instruct us to do so. Remittance must accompany your order. If we are out of any items your money will be returned.
